Tom – The SDUs have not been publically released, although they are public information (meaning that they have been shared outside the EPA). It is not too early to use the SDUs, but there may need to be some explanation with them if you are going to publish them. We can help provide that discussion if you need it. Attached is the latest version of the SDUs. It is not final, but can be shared. We recognize that the focused COCs indicated in the legend have since changed (e.g. BaP EQ to Total PAH, etc...) and we are updating this for Section 3, but this doesn't change the overall shape of the SDU for DEQ to compare to AOPC boundaries.

Subject: SDUs

Kristine-

Has EPA presented a map the 13 SDUs publicly? I see frequent references to AOPCs from the LWG's draft FS, and when I want to update these references to the 13 SDUs, I realize that perhaps I've only seen the SDUs in internal meetings. Is it too early to be using the SDUs? If not, I'd appreciate a clean copy that I could provide to people.

Thanks-

Tom Gainer, P.E.
